| Canyon Star | ☒ | Mountain Aire | ☐ | New Aire | ☐ |
| Ventana LE | ☒ | London Aire | ☐ | Other | ☐ |

## Description

Newmar has determined that certain coaches may have had a substitute water pump installed during the manufacturing process.

**Issue**: The substitution pump requires a 15 amp fuse in lieu of the 10 amp fuse that was installed. This does not pose a safety issue, but the user may overload the 10 amp fuse during pump operation.

**Correction**: Inspect the water pump to see if it states "Fuse: 15A required." If it does, proceed by installing a 15 amp fuse for the water pump and changing the water pump fuse label from 10A to 15A.

**Affected Units**: See attached population list

## Recommended Action

Inspect the water pump to see if it states "Fuse: 15A required." If it does, proceed by installing a 15 amp fuse for the water pump and labeling the fuse panel accordingly. If the pump does not state "Fuse: 15A required" no action is needed. Order fuse and label from the Newmar Parts Department when fuse and label change is necessary.

**Note**: The wiring is sufficient for the new 15 amp fuse.

15 Amp Fuse Part # 22238
15A label

**Flat Rate**: TSB 510 **Labor Time**: .2
