Issue:

Creak Noise coming from the front of the vehicle while steering.

Cause:

Clash condition found between steering gear and front subframe.

Action:

- Confirm customer complaint
- Confirm noise is coming from steering gear area using suitable diagnostic tool
- Check vehicle to see if the clash condition occurs between the subframe and steering gear in the areas shown in the attachments. If it does exist – replace front sub frame using part LR157865 Topix 204.01 Uni Body, Subframe and mounting system, front subframe. (CJLR) LR165928.
- Once replaced – confirm issue is fixed.

If clash condition doesn't exist – continue with diagnostics as per Topix.

Raise ePQR with findings and pictures.
