Re: *Recall Campaign: WQU-56 Propeller Shaft – Parts Supply Update*

Propeller Shaft shipment quantities to cover all affected vehicles retailed prior to August 4th stop sale will be completed this week. Your SOA Zone office has been provided the affected VIN list to identify retailed units. Please contact vehicle owners and arrange appointment to perform recall procedure on their vehicle as soon as possible. The remaining quantity of parts to cover existing retailer stock and vehicles in-transit will be shipped to retailers by the end of next week.
