	Battery (Amp. Req. Vary)	000915105*	1
	Battery (Amp. Req. Vary)	000915105*	1

***VIN Required**

Resetting the indicator

Your authorized Audi dealer will reset the corresponding service schedule after performing the appropriate service on your vehicle. You also have the possibility to reset the oil change schedule after having performed an oil change according to Audi specifications.

Select **CAR** function button > **Car systems** control button > **Servicing & checks** > **Service intervals** > **Reset oil change interval**

Note

- Only reset the oil change display when you have completed an oil change.
- If you disconnect the battery terminals, no calculations can be made for the service interval display during this time and no service reminder will appear. Remember that observing the proper service intervals is vitally important to extending the life of your vehicle, particularly the engine, and maintaining its value. Even if the mileage driven is low, the maximum period of one year from one service to the next must not be exceeded.

Tips

- The information in the Service Reminder remains stored even when the vehicle battery is disconnected.

For current fluid capacity charts, they can be found on ServiceNet under the Maintenance tab.
