

Multiple Loss-of-Communication DTCs Won't Clear?

AFFECTED VEHICLES

2016 MDX and 2015–16 TLX with 9-speed A/T

Can't clear multiple loss-of-communication DTCs? That's because you must first clear all DTCs from the TCM.

If the TCM has any DTCs set, it **won't** communicate with the rest of the control units, resulting in multiple loss-of-communication DTCs.

Such DTCs **can't** be cleared until the TCM is clear of all DTCs.
