

## 2017

during the SVM check vehicle configuration

## A7 / A7 competition / S7 / RS 7 / RS 7 performance Audi Pre-Delivery Inspection

Sto	ck No.	Dealer Number	R.O. No.		
VIN		Road test mileage out	Road test mileage in		
Re	minders	_			
<b>•</b>	All items must be completed prior to customer delivery by an Audi technician				
<b>•</b>	Audi recommends using an Audi approved battery charger to prevent excessive battery discharge during inspection				
<b>•</b>	ALL PDI function tests must be run in Guided Fault Finding (GFF) only. Do NOT use Guided Functions for any PDI related test				

function tests

It is advised to start ODIS with the engine running to enable all 5F Test Plans in GFF and also to ensure SVM sees all control units

as these will not be uploaded to the Paperless Server. Refer to the Special functions tab of ODIS Diagnosis for using GFF for PDI

▶ For items marked with \*, please refer to the PDI Technician Reference Document posted on ServiceNet for additional information

Vehicle Preparation	Trunk Inspection (continued)
<ul> <li>☐ Check Elsa for open campaigns and updates</li> <li>☐ Deactivate vehicle transport mode         This step must be performed with the engine off, and ignition ON*     </li> <li>☐ Deactivate air suspension loading mode (if equipped)*</li> <li>☐ Set adaption channel to enable CD Ripping (if equipped with</li> </ul>	☐ Install wheel bolt cover removal tool from PDI kit into trunk tool kit*  ☐ Verify tool kit is installed securely in luggage compartment ☐ Set spare tire pressure*  ☐ Verify operation of luggage cover
