

Panoramic Glass Roof Sunshade Binds, Sags, or Bunches

AFFECTED VEHICLES

2016 Pilot Elite

EDITOR'S NOTE: This article replaces the one posted in **October 2016** to extend the article's shelf life. The issue(s) covered are still being addressed.

Is the panoramic glass roof sunshade binding, sagging, or bunching? If so, replace it. The replacement sunshade has been countermeasured **not** to do this.

Keep in mind that some minor wrinkling of the sunshade fabric is normal while it's opening or closing and it **doesn't** affect sunshade operation. When in its fully closed position, the sunshade shouldn't have any wrinkles.
