

Front Brakes Squeal During Light to Moderate Braking

AFFECTED VEHICLES

2014–16 RLX

EDITOR'S NOTE: This article replaces the one posted in **October 2016** to extend the article's shelf life. The issue(s) covered are still being addressed.

Are you hearing a high-pitched squeal from the front brakes during light to moderate braking? We're aware of this issue and are looking for a solution.

In the meantime, replacing the brake pads and turning or replacing the brake discs may temporarily stop the noise.
