P3000/123 Battery Control DTC Diagnostic Tips

Service Category

Engine/Hybrid System

Section

Hybrid/Battery Control System

Applicability

2001-2009 Prius

APPLICABLE VEHICLES

2001-2009

Prius

CONDITION

When a DTC is detected by the HV Battery ECU, the HV Control ECU will automatically store a P3000, Information Code 123 "HV Battery Control System Malfunction" DTC.

The purpose of the P3000/123 is to capture the state of the Hybrid Control System when the HV Battery ECU DTC sets. It does not indicate a malfunction of the HV Control ECU.

RECOMMENDATIONS

Do not attempt to diagnose the P3000/123 DTC, diagnose the HV Battery ECU DTC(s).

If the P3000 DTC has a different Information Code (125, 388, 389, or 603), follow the Repair Manual diagnostics for that Information Code.
