TECHNICAL SERVICE BULLETIN

SUBJECT: SPECIAL SERVICE TOOL FOR HOOD RELEASE
LEVER REMOVAL

This bulletin provides information related to the introduction of a new Special Service Tool (SST) (A) developed to prevent the hood release lever pivot point (B) from being damaged when removing the hood release lever. Follow the instructions included in this bulletin to properly remove the hood release lever using the new SST.

* NOTICE

One SST will be shipped to every dealer free of charge. Additional tools can be ordered through Snap-on (see page 2). Make sure this tool is available to technicians whenever removal of the hood release lever is required.

SUBJECT:**SPECIAL SERVICE TOOL FOR HOOD RELEASE
LEVER REMOVAL****SERVICE PROCEDURE:**

1. Insert the SST into the hole on the hood release lever, as shown.

2. While applying slight inward pressure to the end of the SST, use a plastic prying tool to remove the hood release lever.

3. To reinstall, place the hood release lever on the pivot point and gently snap it in place.

REQUIRED SPECIAL TOOLS:

Tool Name	Part Number	Comments
Hood Release Lever Tool	07120-11000	Additional tools can be ordered through Snap-on Equipment Solutions at (888) 542-1011
