Engine Control Module (ECM), Software Updates D11J, D13J, D16J VAH, VHD, VN

SP 284-064, Engine Control Module (ECM), Software Updates

(September 2016)

Information

Software updates with enhancements are available for the Engine Control Module (ECM) for VOLVO D11J, D13J and D16J engines with US2016 emission level on vehicles built from January 4, 2016 to May 6, 2016. Software updates address the following.

 Campaign needed to update trucks shipped to California for inducement strategy on meeting CARB Regulations, and implement Selective Catalytic Reduction (SCR) inducement (5mph) for NOx conversion.

Required Tools

Premium Tech Tool (PTT) version 2.05.23 or higher Vocom Diagnostic Connector 88890304 Communication Interface 88890300

Note: Using other interfaces may affect programming speed.

Note: Check Premium Tech Tool version by clicking on Help tab and then click on "About Tech Tool".

Software Update Procedure

You must read and understand the precautions and guidelines in Service Information, group 20, "General Safety Practices, Engines" before performing this procedure. If you are not properly trained and certified in this procedure, ask your supervisor for training before you perform it.

Do not attempt to repair or service this vehicle without having sufficient training, the correct service literature and the proper tools. Failure to follow this could make the vehicle unsafe and lead to serious personal injury or death.

- 1 Park the vehicle on a level surface.
- 2 Apply the parking brake.
- 3 Place the transmission in neutral or park.
- 4 Install the wheel chocks.

- 5 Verify service program eligibility by checking service program status in VDA.
- 6 Connect Premium Tech Tool (PTT) to the vehicle diagnostics connector using the 16 pin OBD cable 88890304 and Communication Interface 88890300. Connect the PC to a functional LAN or modem connection and a 120 Volt AC source.
