To reset the display

The dealership performing the service resets the display when the service has been completed. The display is reset as follows:

- Switch the ignition on.
- Pull the knob ⑧ ⇒ *fig. 2*, this message appears: **OIL CHANGE!**

Fig. 2 Overview of the instrument cluster

- Pull the knob until the display **OIL CHANGE IN ----- MI (KM)--- DAYS** appears in the display. If the reset button is not pulled within 5 seconds, the display reset mode closes.

Tips

- If a malfunction is present (red symbol), the distance remaining cannot be called up.
- Do not reset the display between service intervals. Doing so will result in an incorrect display.
- If the battery is disconnected, the Service Interval Display values are retained.
- On vehicles with the Driver Information System, you can also call up the service interval display.
- If the service was not performed at the correct time or the service interval display was not reset after service was performed, the additional mileage driven or the elapsed days will be shown as negative numbers.

TT and TTS 2009 FLUID CAPACITY CHART updated 25 June 2010

Vehicle (Sales Code)	Engine Oil approx. qty. w/filter change	Manual Trans	Auto Trans	Rear Final Drive	Cooling System	Power Steering	Brake System	A/C System	Windshield & Headlight Fluid
