26 15 06 July 14, 2015 **2039436** Supersedes Technical Bulletin V261504 dated April 30, 2015 to include applicable model VIN ranges.

Ad Blue Warning and or MIL ON - Ad Blue Leakage at Reductant Injector

The following fault code may also be stored in the ECM Fault Memory:

DTC	Description
P20E8	Reductant Pressure Too Low

Das Auto

Technical Bulletin

Technical Background

Welding process issues of the reductant line connector to the supply line may cause Ad Blue leakage at the reductant injector.

Production Solution

Improved parts implemented into production.

Service

Inspect the connection of the reductant supply line connector at the reductant injector in the engine compartment. If white crystalized (dried) Ad Blue is found at the reductant injector (see Figure 1 & 2), it will be necessary to replace the reductant supply line.

Figure 1

Figure 2

Thoroughly clean the area of the reductant supply line connection with water to remove the crystalized Ad Blue. Replace the reductant supply line.

It is not necessary to replace the reductant injector.

Warranty

To determine if th		dure is co	vered under Warr	anty, always refer	to the Wa	arranty Po	olicies and
