I Note:

To determine if this procedure is covered under Warranty, always refer to the *Warranty Policies and Procedures Manual.*

Documentation required per Warranty Policies and Procedures Manual.

For vehicles outside of the *Limited Warranty Against Corrosion Perforation* this Technical Bulletin is for information only.

Technical Background

Alignments in production can lead to hairline cracks in the top coat and paint damage (edges on holes) on the already painted door. Humidity then penetrates paint and causes blistering and/or white corrosion.

Production Solution

Corrections in the production process after discovering deviations.

Service

Procedure:

A. Repair rear door <u>Only perform this operation if the total repair cost is 80% or less of the total replacement</u> <u>cost.</u>

or

B. Replace rear door

Steps 1 and 2 should be completed regardless of repair or replacement of the door.

1. Central protective strip

2. Lower protective strip

- In most cases the protective strips are damaged when they are removed. Order, and as necessary, paint the required parts before the repair.
- Inspect the outer and inner doors in the visible area for further paint bubbles. As necessary repair according to Volkswagen guidelines.
- Inspect the fine seam sealing in the inner edge area of the doors for cracks, and as necessary, repair according to Volkswagen guidelines.

A. Repair the rear door as follows:

• Disassemble the door according to the repair manual. See Repair Group 58 in Elsa

If the affected area is only lightly corroded (no through-corrosion), proceed as follows:

- Inspect the inner edge area of the doors for cracks, particularly the fine seam sealing.
- Completely remove the corrosion in the damaged area.
- Apply a VOC compliant epoxy primer as an anti-corrosion treatment and primer to both sides of the door (locally sourced).
- Seal the edges/metal sheathings with adhesive (part number: AKD 476 KD505) before painting.
- Repaint door according to Volkswagen guidelines

B. Replace the rear door as follows:

- Replace the door according to the repair manual. See Repair Group 58 in Elsa.
- Paint new door according to Volkswagen guidelines.

Page 4 of 12 Plus attachment

Steps 1 and 2 should be completed regardless of repair or replacement of the door.

1. Central protective strip

• Before installing the side protective strip, attach from outside, and only on the front and rear holes/elongated hole (Figure 6 and 7, red arrows), a trim protective foil (part number: AKL 448 030 05) or similar as additional anti-chafing protection.

Figure 6

Figure 7: (example)

Page 5 of 12 Plus attachment

• Before installing the side protective strip, adhere (press) the foil around the hole lightly (e.g. with a ball pen, illustration 8).

Note

Make sure that the painted edges do not get damaged when attaching the foil.

Figure 8: (example)

2. Lower protective strip

• Before installing the lower protective strip, attach on every front and rear hole (Figure 9, red arrows) from outside, trim protective foil (part number: AKL 448 030 05) as additional anti-chafing protection.

Figure 9

• Before installing the protective strip adhere (press) the foil around the hole lightly.

 Attach new and loose plastic adjustment screws (Figure 10, red circle) with locking compound (part number: D 185 410 A2).

Figure 10: (example)

• Adjust the protective strip (according to the repair manual) within the hardening time of the locking compound (part number: D 185 410 A2).

Warranty

Note:

- Dealers may complete the repair as described without prior authorization (through a WISE Warranty Repair Acceptance request).
- Documentation required: Clear pictures, completed estimate and body shop invoice must be saved and kept on file at the Dealership for audit purposes.
- This bulletin applies for 1 door repair or replacement. If multiple doors exhibit the corrosion they should be evaluated individually and claimed on separates lines. Total Body Painting Prep Time for both doors should be claimed on the first line only.
- Labor time units (TU), Material units (MU), and Material unit rate are correct at the time of publication. The . time units and/or material units may differ if the repair catalogue is updated. The information in the repair catalogue applies, except for the open time items (labor operations ending in 99) which are calculated at actual time multiplied by the body shop labor rate. The material allowance (Paint material price per unit) is subject to change. Refer to WISE > Resource Center > Forms > Paint/Corrosion for the most current forms.
- This section is applicable for vehicles within the terms of Volkswagen's Limited Warranty Against Corrosion Perforation. For vehicles outside the terms of the Limited Warranty Against Corrosion Perforation this section is for information only.
- This bulletin may be provided to outside shops to ensure the proper repair is completed.

Note:

Claim Processing

Utilize the attached form examples and pre-populated forms on WISE to assist with calculating the reimbursement amounts. This will expedite the claim review process and reduce the time to pay the claim.

Note that miscalculations are subject to claim adjustment. You can email completed excel forms (in the excel format) to paintcamp@vw.com. The Paint and Corrosion Team will review your completed form(s) and adjust for overlap on behalf of the dealer.

For the complete set of pre-populated Paint/Corrosion Claim Form templates associated with this Technical Bulletin, refer to WISE > Resource Center > Forms > Paint/Corrosion.
