

No Phonebook on the ODMD™ Using an iPhone with iOS 11

AFFECTED VEHICLES

2013–17 ILX, 2013–17 MDX, 2016–18 RDX, and 2013–18 TLX

We're currently looking at an issue that when connected to *Bluetooth*® HandsFreeLink® using an iPhone with iOS 11, there's no phonebook showing up on the On Demand Multi-Use Display™ (ODMD). If the phonebook doesn't download, clients will have trouble accessing phonebook contacts using the voice control system.

If you get a vehicle in your shop for this, be aware there's nothing you can do about it at this time. So, don't try replacing any parts; it won't make a difference.

For now, we're asking the service consultants to have their clients access their phonebook contacts using SIRI (if available). We'll let you know when there's a permanent solution available.
