Vehicle Interior

Theft Deterrent/Keyless Entry

Applicability

2011 RX, LS, GX, CT, and HS

APPLICABLE VEHICLES

2011	GX460	2011	RX450H
2011	HS250H	2011	CT200H
2011	RX350	2011	LS600H
2011	LS460		

CONDITION

For the models listed above, the Electronic Parts Catalog (EPC) may not include enough detail to determine appropriate keys and receiver replacement parts. This Tech Tip will help you identify the system type prior to ordering replacement keys and/or Door Control Receiver.

RECOMMENDATIONS

Use the following information to:

- identify system type (AM or FM modulation)
- choose appropriate parts

prior to ordering, attempting to program keys, or installing new Door Control Receiver:

Identify System Type:

If one working key fob is present, identify the system type by FCC ID on key:

Example: This key fob has an FCC ID ending in AB, if this key operates Smart access or wireless locks, vehicle is equipped with an AM modulated system:

- AB = AM system
- CX (or other) = FM system

NOTE: Both types of keys will operate immobilizer when held over start button.

If all keys are missing, find service history identifying previous change to FM or it will be necessary to access Door Control Receiver in rear of vehicle and identify by part number.

Example: This Door Control Receiver has a part number on the upper RH corner of the part label.

NAP RX350:	89740-0E040 = AM / 89740-0E010 = FM
CBU RX350/450h:	89740-48200 = AM / 89740-48070 or -0E010 = FM
LS460/600h:	89740-50061 = AM / 89740-50180 = FM
GX460:	89740-60170 = AM / 89740-60080 = FM
CT200h:	89740-76090 = AM / 89740-76010 = FM
HS250h:	89740-75140 = AM / 89740-75050 = FM

See Pages 2 and 3 for visual of Door Control Receiver locations by model
