When braking - Clicking audible from front wheel corner(s)

## Customer statement / workshop findings

Clicking audible from front wheel, corners(s) of vehicle, whilst driving forwards and brakes are applied from 10mph to stop with no steering input

## Technical background

## Production change

## Measure

Ensure fault is as described in customer statement and reference video <https://vimeo.com/269611886>

If so replace both front brake discs Rep.Gp.46 Front brake discs – To remove and fit

**For this TPI only the best practice of replacing brake pads whenever new brake discs are fitted is only required if, on inspection, the brake pads are determined not to be serviceable i.e. they are found to be worn, cracked, uneven wear (as per Service Manual Visual inspection)**
