

December 2015 Technical Service

SUBJECT

New programming feature: Exclusion of Infotainment Control Units from Programming

MODEL E82 (1 Series Coupe)

E84 (X1)

E88 (1 Series Convertible)

E89 (Z4)

E90 (3 Series Sedan)

E91 (3 Series Sports Wagon)

E92 (3 Series Coupe)

E93 (3 Series Convertible)

SITUATION

Programming with ISTA/P 3.57.4, or a more recent update, displays a new Pop-Up window providing options for systems programming.

Type code: Paint code: Integr. level (pla	Attention: Important Information Regarding selective Programming of E&C components The use of the selective programming feature will result in a difference in I-Levels within the vehicle. This may have an effect on the infotainment system or might affect Check Control Messages.							
Last treated with Optional extras:	After programming you must verify correct operation of all infotainment system components. If any errors or Check Control Messages are present, the entire vehicle must then be re-programmed.

INFORMATION

In order to gain flexibility and save time when programming E-Series vehicles, ISTA/P now provides three options (as shown in the screenshot above) for programming the control units on the vehicle:

Selected Option	Control Units Programmed	
Infotainment and Communication*	All other	
Exclude the components Infotainment and Communication		X
Programming only the components: Infotainment and Communication	X	
No (regular programming of all components) - DEFAULT	X	X

- *Infotainment and Communication Control Units:
- Headunit/Radio
- Rear Seat Entertainment
- Amplifier

- Telephone/Connectivity
- Central Display
- IDrive
- CD-Changer

When the complete programming plan has been calculated, the control unit tree displays all control units, indicating with a gray dot which will not be updated.
