### Complaint:

When repairing power steering hose connection to power steering cooler, clamp part number is not referenced in EPC for OM642/OM651

### Cause:

When attempting to look up the correct part number by VIN in the Electronic Parts Catalog there is no part number supplied for the hose clamp

### Remedy:

1. See WIS instruction AR46.25-D-3020-01SE (Disconnect / connect hydraulic lines on power steering cooler)
2. Clean area around port connection of power steering tube using a lint free rag

Note: Make sure the hard line connection at flange end is cleaned of oil residue

3. Replace the spring clamp by using special tool (454 589 00 37 00)

Note: Use Spring Clamp A 000 995 65 05

4. Fill power steering reservoir and bleed system (Follow WIS document AR46.30-S-0010S)

Note: EPC/XPPI will be corrected to reflect the correct information

<b>Symptoms</b>
Chassis/suspension / Steering system / Leakage / Leaks
