To: Toyota Dealers  
From: Product Support Division

**Limited Service Campaign H0F – Remedy Notice**  
**Certain 2005 – 2010 Model Year Tacoma**  
**Certain 2007 – 2008 Model Year Tundra**  
**Certain 2005 – 2008 Model Year Sequoia**  
**Frame Corrosion Resistant Compound (CRC) Application**

As with prior CRC campaigns, the H0F Corrosion Resistant Compound (CRC) campaign is subject to state and local air emissions and permitting requirements. These requirements vary, and in the following regions, CRC application for the H0F **may not yet begin**, as Toyota is still waiting for certain approvals/notifications:

- **Massachusetts**
- **West Virginia**

Dealers located in each the foregoing areas will be notified when CRC application may begin under the H0F in their area, which we anticipate will occur sometime during the month of September 2017.

Additionally, in **Pennsylvania**, dealers must wait until after the 15 working day notification period has run. Notice was provided by Toyota on August 25, 2017, so in Pennsylvania, CRC application may begin as follows:

- **Pennsylvania (all areas, including Allegheny County and Philadelphia County)**
  - On or after September 18, 2017

In the meantime, dealers located in each of the foregoing areas may perform frame inspections and customer outreach and scheduling to prepare for the H0F, but no orders of CRC materials will be released to these dealers until the time when Toyota notifies these dealers that CRC application may begin under the H0F.

If you have any questions, please contact your FTS (Field Technical Specialist) or DSPM (District Service & Parts Manager) for assistance.

Thank you for your cooperation.
