Subject: Upcoming Update 64F3 - Coolant Breather Line
Certain MY 2016-2017 Audi S8+ Vehicles

We would like to inform you of an upcoming Update, code 64F3.

What vehicles are affected?

There are 878 Audi vehicles in the U.S. and 103 vehicles in Canada affected by this Update. Check your daily campaign open inventory report or OMD for affected vehicles in your inventory.

What is the issue?

On Audi S8+ vehicles manufactured within a specific period, a non-return valve is not fitted in the breather line. As a result, the heating output inside the vehicle may be reduced.

What does the repair procedure involve?

Install coolant breather line, bleed cooling system and adjust headlights and Perform GFF test plan for adjusting headlamps.

When will the Update be available?

This Update will be visible in Elsa and ServiceNet on or about November 30, 2018.

Please refer to the Elsa campaign/action screen for confirmation of whether the Update applies to each specific vehicle. Additionally, this Update is posted on Elsa and ServiceNet for additional information and complete repair instructions.

Consistent with general Audi corporate policy governing Updates, Audi is not notifying consumers. (Updates differ from recalls and service actions; consumers are notified in writing of recalls and service actions.) Each vehicle should be completed when it is in to the dealer for maintenance or any other service visit. Dealer stock vehicles **cannot, however, be delivered** to consumers until the Update is completed.

To identify any vehicles in your inventory that are affected by this Update, please run the “New and CPO Inventory Open Campaign/Action Listing” report from the OMD Web system.

Dealers must ensure that every affected vehicle gets the update before delivery to consumers. Your effort is integral in reaching the highest quality expectations of Audi customers.

Thank you for your cooperation and assistance in this important matter.
