# PREVOST

1. Remove L.H. side rear fender.

FIGURE 1

## Drain the cooling system

2. Connect the coolant extractor. Use the coolant extractor to drain the coolant from the engine. An alternate method is to drain the coolant into a suitable container using the drain hose.

FIGURE 2

3. Unfasten cap screws and remove **access panel** located behind tag axle L.H. side wheel.

FIGURE 3

4. Open radiator door to access radiator assembly. Unfasten **upper arm assembly**.

FIGURE 4

5. Remove radiator **sealing frame**.

FIGURE 5

6. **Remove clamps** and then break hoses from the front coolant and charge air pipes.

FIGURE 6

7. **Remove** rear coolant and charge air hose **clamps** then break hoses loose.

FIGURE 7

8. Remove the upper radiator assembly **support bracket**.

FIGURE 8

9. Remove the lower radiator assembly protector tube.

FIGURE 9

10. Disconnect the **radiator vent hose** on top of the radiator.

11. Cut the cable tie and disconnect **electrical connector** from the fan clutch. The remaining connector on the chassis cable will be capped and left in place.

12. Remove fan **drive shaft** fasteners at the fan clutch.

FIGURE 10

13. Open the secondary lock of **connector #561610**. Insert a **cavity plug #561783** in each of the four (4) cavities with the smallest end protruding as shown on the example at right. Close the secondary lock.

FIGURE 11

14. Cap the chassis fan clutch cable with this connector. Secure the connector on the inner wall above the radiator using:

- *1x tree mount #504750*
- *1x nylon tie #504016*

FIGURE 12

FIGURE 13

15. Remove the fan drive casting.

FIGURE 14

16. Unscrew all lower radiator assembly **mounting fasteners** (2 bolts on R.H. side, 2 bolts on L.H. side).

FIGURE 15

17. Position a **forklift** under the radiator assembly that is capable of safely lifting the radiator. With assistance, slide radiator assembly out and onto the forklift. Transfer radiator assembly to a secure location.

FIGURE 16

18. Remove the **tripod** from the radiator/CAC assembly.

FIGURE 17

FIGURE 18

19. Remove the fan **shroud**.

FIGURE 19

20. The new cooling pack arrangement requires being located **four inches** closer to the engine to give the needed clearance for the electric fans. For this reason, **rotate** both the radiator/CAC assembly **mounting support 180°** and reinstall.
