**“Right first time in Time”**

12 Volt support batteries, part number 30659531, must be maintained 9 months from the month of manufacture and every 9 months thereafter. To maintain the battery, connect the battery to an appropriate 12V battery charger. Please follow all precautions that apply when charging a larger main lead-acid battery.

The battery will self-discharge over time and if allowed to be left at a sufficiently low voltage, it will become permanently damaged. The battery must have a minimum voltage of 9 volts to be installed in a vehicle.

The battery will have a sticker on the side of the part itself, which will show the production month (circled in red below). The sticker may be of a different color, depending on the production month. After recharging the battery, please mark on the box the date that the battery was maintained.

Please keep the above factors in mind when ordering these batteries.

The following part number applies:

Part Number	Description
30659531	Battery
