

# Preliminary Information

## PIC6305 Buzz Noise Heard At Idle

### Models

Brand:	Model:	Model Years:	VIN:		Engine:	Transmissions:
			from	to		
Chevrolet	Cruze	2018	J710002	J7102070	LE2	All
Involved Region or Country	North America					
Condition	A customer may comment of a buzz type noise heard at idle. The noise can be turned on and off by activating and deactivating the canister purge solenoid using the scan tool.					
Cause	Mass dampeners may be missing from the evaporative emission purge valve line.					

### Correction:

Inspect evap purge line underhood (figure 1) to see if mass dampeners were installed (figure 2).

If mass dampeners are present, proceed with SI diagnostics.

If mass dampeners are not present, contact TAC to get a mass dampener kit.

Install kit per included instructions – re-evaluate noise.
