

Technical Service Bulletin

01 MIL on with hissing noise, DTC P227900 stored in the ECM

01 19 15 2054795/1 April 23, 2019.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
Q8	2019	All	Not Applicable

Condition

Customer states:

- MIL on.
- Hissing noise from engine compartment during idle.

Workshop findings:

The following DTC is stored in the engine control module (ECM), J623 (address word 0001):

- **DTC P227900** (Intake Air System Leak).

Technical Service Bulletin

Technical Background

During assembly on a small number of the model year 2019 vehicles, the oil fill extension tube (Figure 1) may have been assembled incorrectly. If this extension tube is cross threaded, an intake/vacuum leak may be generated at the interface between the extension tube and the valve cover (Figure 1, 7). If an intake/vacuum leak is suspected, please inspect this component and verify proper sealing. If any components are damaged from cross threading, replace as necessary.

Figure 1. Oil fill extension tube (see possible cross threading at number 7 on diagram).

Production Solution

Improved assembly process and work instruction.

Service

Not applicable.
