**CONDITION**

Some 2019 model year RAV4 & RAV4 HV may exhibit a condition where the driver seat memory is inoperative or is not registered (initialized).

This may be caused by the seat memory initialization not being conducted during PDS.

**RECOMMENDATIONS**

In the event the seat memory is inoperative perform the initialization procedure in the repair manual:

- Performed memory seat registration (initialization).
- After completing memory seat registration (initialization) verify memory seat function.
