Re: *WUE-90 Brake Light Switch tool – additional stock*

SOA has received multiple requests for additional 83399FJ000RT brake light switch tools and now has sufficient additional stock to allow retailers to place orders for single tools.

Retailers needing additional tools should place an order in the Retail Parts Mgmt. System (RPM) for single tools. Orders will be reviewed before release and orders for multiple tools will be deleted without fulfillment.

REMINDER:

SOA also strongly suggests adding a lanyard or other tether like device to help identify that the tool is still in the vehicle. See below for a good example.
