

Seat belt does not roll up correctly

Topic number	LI91.40-N-062773
Version	3
Function group	91.40 Seat belts, emergency tensioning retractors
Date	07-11-2019
Validity	Model 447, 906, 907
Reason for change	Content updated and removal of inapplicable vehicles.
Reason for block	

Complaint:

Seat belt (front and/or rear) does not roll up correctly.

Cause:

Dirt deposits on the seat belt guide due to a dirty seat belt (see picture 01).

Attachments	
File	Description
01.jpg	Seat belt guide dirty. The dirt visible here can stop the seat belt rolling up properly.

Remedy:

1. Remove dirt deposits on seat belt using a dry cloth or a soft brush then clean seat belt (see AP91.40-S-1000-01A).

2. Check guide slot of belt guide on B-pillars or passenger seats for soiling, and clean if necessary (see AP68.30-S-1000-01A).

Note: When cleaning the seat belt guide bracket, observe cleaning instructions for seat belts in the owner's manual! Use cleaner for plastic parts. Only treat the belt guide, not the seat belt!

3. If the cleaning does not bring about any improvement, replace the corresponding seat belt.

Information: To do so, refer to the corresponding WIS documents.

Note: As the dirty seatbelt condition is a result of customer misuse, any replacement of components or the invoicing of material or wage costs under warranty or goodwill in connection with the situation described in this TIPS document is not permissible.

Symptoms
Body / Safety system / Seat belt / Seat belt / Belt strap rolls up poorly
