

Latest Vehicle Concern Fixes

Range Prediction	19MY I-PACE
<p>Customer Voice:</p> <ul style="list-style-type: none">• Range does not exceed 201 miles (323 km) in the instrument cluster. <p>Technical Description:</p> <ul style="list-style-type: none">• At PDI or after a PCM update, range may display 201 in the cluster. This is due to an erroneous significant negative temperature value (-40deg) is reported by the PCM during the vehicle manufacturing process (due to ambient temperature sensor not being fitted when PCM is first powered). <p>Status:</p> <ul style="list-style-type: none">• There is a manual patch available to resolve this concern, follow instructions from SSM 74445.• Please ensure you follow all the steps.• Step 26 advises to perform the range reset procedure which is in Bulletin NAS18.11.014 and a brief description is in the SSM itself as well. This step is crucial at the end of the procedure. The range will adapt to the customer driving style over time.	 <p>The image shows a close-up of the instrument cluster for a 19MY I-PACE. The central display shows 'P' for Park, '0' mph, and a range of '130 miles'. The odometer shows '001389 miles'. The battery status is 'CHARGE READY' and the temperature is '27°C'. The power mode is 'POWER'.</p>
