SUBJECT: DAVCO Shop Pro® FXP 95-230V – For Chile and Italy Electrical Systems
(PN: DDV470E19004)

GENERAL INFORMATION

DAVCO has created a version of the Shop Pro FXP 95 that is equipped with a 230V 50Hz motor and a plug compatible with electrical systems of Chile and Italy (PN: DDV470E19004). The DAVCO FXP95-230V meets the EPA07 – GHG14 priming pressure requirements for all repair and maintenance procedures of DD engines. Additionally, this Shop Pro primer meets the increased priming pressure requirements for all GHG17 DD engines (95psi).

Standard features include:

- Regulated Pressure Unit - Adjustable from 50 – 95 psi for all makes of engines
- Reliable, continuous, duty-rated A/C motor and proven, positive displacement fuel pump for years of trouble-free use
- 95 psi output pressure that provides a surge of fuel into the rail and to all injectors. This allows for a complete fuel system prime after pump or injector replacement.
- Uses the vehicle's fuel supply, eliminating shop fuel requirement and shortening labor time
- Tank sweeping function
- Fuel system flushing function
- Fuel transfer function

ORDERING INFORMATION

Tool PN: DDV470E19004 can be ordered through Paragon using a DDE supplier prefix.

CONTACT INFORMATION
