## Description

This Campaign is being issued to address Variable Geometry Turbocharger Actuator failures on certain ISL9 CM2350 L101 and L9 CM2350 L116B engines in Fire Truck applications. This document authorizes certified repair locations to replace the Variable Geometry Turbocharger Actuator.

## Action

In order to qualify for repair under this field action, an engine:

1. will be covered regardless of coverage status, and
2. **must** show as OPEN on QuickServe® Online for this field action.

**Note :** The ESN list is attached for reference.

After verifying that the engine meets the above requirements, perform the following actions:

1. Replace the Variable Geometry Turbocharger Actuator using service procedure 010-134 in the appropriate Cummins Service Manual.

## Material Disposition

Where applicable, items removed should be returned to ReCon for core credit. Unless otherwise indicated, items with no core liability can be scrapped.

## Reimbursements

### Parts

**Note :** All parts listed are OPTIONAL. Claim **only** the parts required to complete the repair. Additional parts, such as o-rings, gaskets and fasteners, that are required to complete the repair, but **not** listed, may be claimed if sufficiently explained in the claim narrative. ReCon (RX) parts should be used and claimed when performing all Cummins Field Actions. New or NX parts should **only** be used when making before-in-service repairs. Additionally, due to local laws, RX/PX parts may **not** be available for use in the repair. If this is the case for your region, use the New part equivalent of the appropriate ReCon part. Further, if RX/PX parts are **not** readily available to complete the repair in a timely fashion, the new part equivalent can be secured and used for the repair.

The following parts are covered under this field action:
