

Service Campaign T3T Dealer Best Practice

Date: November 15, 2019

Attn: Dealer Principal/General Manager/Service Manager/Parts Manager

Subject: Service Campaign T3T: DTC P0128 ECM SOFTWARE UPDATE (TSB #19-01-016H-1 supersedes TSB #19-01-016H)

Updates To This Document	Date
<ul style="list-style-type: none"> Service Campaign T3T Update: Reference to TSB #19-02-016H-1 for the JS Veloster GDS ECM Update event and ROM ID table. 	11/15/19

*****IMPORTANT Dealer Stock and Retail Vehicles*****

Dealers must perform this Service Campaign on all affected vehicles prior to customer retail delivery and whenever an affected vehicle is in the shop for any maintenance or repair.

Affected Vehicles

Hyundai has launched a Service Campaign to update the ECM (Engine Control Module) software for DTC P0128: Coolant Thermostat (Coolant Temp below Thermostat Regulating Temperature) logic improvement.

The affected vehicles include:

- Certain 2018 Elantra GT (PD) and 2019 Veloster (JS) equipped with 1.6L Turbo engine.

Hyundai is initiating this action to ensure the quality of its vehicles and the continued satisfaction of Hyundai customers.

Description

This dealer best practice provides information related to an ECM (Engine Control Module) software update for DTC P0128: Coolant Thermostat (Coolant Temp below Thermostat Regulating Temperature) logic improvement.

There are no drivability symptoms associated with DTC P0128.

Service Action

Reservation – Always check the Vehicle Information Screen in WebDCS for open campaigns and recalls, and advise the customer on time requirements.

Readiness – Review this announcement and the accompanying FAQs with all Service and Parts staff including Reservationist/BDC. Also, complete all applicable training, check your reservation capacity settings (you can set separate capacities for every recall/campaign), confirm email addresses for campaign appointments, and that you have all necessary tools, campaign parts and shop equipment as needed.

- This campaign can be completed quickly and does not require a hoist.
- Share** this information with the **Sales Department** so affected vehicles in dealer stock can have **Service Campaign T3T** completed prior to customer retail delivery or customer test drives.

Reception – Always check the Vehicle Information Screen in WebDCS for open campaigns and recalls, and print a copy for technicians. Provide SRC or an alternative vehicle, as needed. If a customer has declined the campaign, note this on the repair order and request the customer's signature next to the statement.

Repair – Always plug in the GDS before starting the repair. Make sure to complete an MPI on all vehicles and Quality Control your work.

- You must initially perform a GDS ECM/ESC update in Auto Mode

- This campaign requires the vehicle to be on during the update process, but not running. If the vehicle voltage falls below 12 volts during the update process, hit back on the GDS and run the engine for at least 20 minutes in a well ventilated area
- Refer to TSB #15-GI-001 for the tablet-based Mobile GDS ECU update procedures
- After completion of the software updates, clear all DTCs and confirm normal vehicle operation
- If a part is found in need of replacement while performing Service Campaign T3T and the affected part is still under warranty, submit a separate warranty claim using the same Repair Order. If the affected part is out of warranty, submit a Prior Approval Request for goodwill consideration prior to performing the work.

Return – Review all completed campaign and repairs to answer any customer questions. Also, schedule the customer's next service.

Reconnect – Follow up for customer satisfaction.

Parts

No parts are associated with this campaign.

Customer Notification

None

Thank you for your prompt attention to this important matter and continued commitment to Hyundai customers.
