New My Triumph Connectivity System Now Available For Order

Triumph Motorcycles is pleased to confirm the innovative new My Triumph Connectivity System is now available for order for new-generation TFT equipped Triumph Scrambler 1200 XC, Scrambler 1200 XE, Rocket 3 R, Rocket 3 GT and Rocket TFC models.

- **Beginning today, customers can visit their authorized Triumph dealer in order to purchase and have the My Triumph Connectivity System fitted to their Scrambler 1200 or Rocket 3 motorcycle**
- **The accessory My Triumph Connectivity System includes:**
 - My Triumph Connectivity module
 - Software update for the My Triumph Connectivity module
 - Software update for the TFT instruments
- **Price:**
 - BT Module Part Number: A9820200 – **\$215**
 - Installation Kit/Scrambler 1200: A9828055 – **\$20**
 - Installation Kit/Rocket 3 (All models): A9801015 – **\$20**
- **Installation time is approximately 60 minutes and will include fitting kit and software upload**

Triumph Motorcycles is also pleased to announce the launch of the all-new My Triumph software application:

- **The new My Triumph app is now available to download for free on Android™ and iOS™ compatible mobile phones**
- **The core functionality of the My Triumph app includes the following features:**
 1. Records your route, then displays a summary of your journey and allows it to be shared with friends
 2. Built in collaboration with Google, live navigation on the motorcycle's TFT instruments is facilitated through the new My Triumph Connectivity system
 3. Monitors the status of the Triumph motorcycle, presenting key information such as odometer, average fuel consumption and time/distance to service, facilitated through the new My Triumph Connectivity system

THE NEW MY TRIUMPH TFT CONNECTIVITY SYSTEM

Triumph introduces a whole new generation of motorcycle connectivity designed to deliver an enhanced rider experience with a host of class-defining connectivity features.

- **Features and benefits include:**

1. World's first motorcycle-integrated 'GoPro' control system
2. Triumph's first 'turn-by-turn' navigation system built with Google, representing Google's first partnership with a premium motorcycle manufacturer
3. Music and phone operation
4. Class-defining level of connectivity for an enhanced rider experience

- **Intuitive operation and rider functionality:**

1. All features facilitated by new accessory My Triumph Connectivity module
2. All features accessed and managed by the rider via the TFT instruments
3. Turn-by-turn navigation supported by an all-new 'My Triumph' app, now available for Android™ and iOS™ compatible mobile phones
4. Owners will need to visit their Triumph dealers to have the accessory My Triumph Connectivity module fitted and the system software applied

CLASS-DEFINING SYSTEM FEATURES

World's first motorcycle integrated GoPro control system

Triumph introduces the first motorcycle integrated GoPro control system. The rider can capture every moment on their ride by connecting their GoPro to the TFT display where they can intuitively access and control key GoPro functions through the motorcycle's TFT instruments and left hand switchcube.

The TFT instruments display simple graphic icons on the screen, indicating the status of their GoPro camera, including mode, start film, stop film, take photo and battery level.

This system is compatible with all GoPro cameras from HERO 5 and SESSION 5 onwards.

Triumph's first turn-by-turn navigation system built with Google

The first for any Triumph motorcycle and the very first Google partnership with a premium motorcycle manufacturer – the Triumph 'turn-by-turn' navigation system facilitates navigation through the My Triumph Connectivity module, which can be installed by your local dealer.

This great functionality will enable you to connect with hundreds of millions of places and businesses, and add up to 21 destinations along the route if required, with reliable location-aware search suggestions.

Once the rider has selected the route on the 'My Triumph' app and set-off, precise turn indications with clear graphic turn symbols appear on the TFT screen. This sophisticated navigation system gives riders a simple and easy way to set their route and find their destination, both on short and long journeys.

Phone and music operation

Facilitated through the My Triumph Connectivity module, this functionality enables the rider to pair their smartphone and Bluetooth® headset to the connectivity system, providing full and intuitive control on the move.

Phone functions such as making and receiving calls and SMS message notification can be controlled via the left hand switchcube, as can music track selection.
