## Product Change Notice - Slimrack® gear racks rounded edges

Dear Valued Customer:

Please be advised, after gathering customer feedback, LCI intends to change the milling on its Slimrack gear racks to created rounded edges.

The change is being made to decrease the chance of the gear racks scraping or scratching the slide box while the system is being installed. There is very minimal visible difference with the smoother racks.

There is no other change in fit, form, function or installation of the gear racks. There is also no price change and no part number change. The change is expected to begin on a running basis on or around 2/17/20 for clear and 3/17/20 for black.
