Ref. # 13574-SVC

TOL

2020 Rocket 3 Oil Requirements

In order to highlight engine oil requirements for new Triumph Rocket 3 models documented in **Technical News 199**, the official Triumph owner's manual recommends Castrol Power 1 4T 15W-50 synthetic motorcycle oil for all new Rocket 3 models. However, this particular viscosity is not offered by Castrol in North America; so for North American dealers Triumph is recommending any high quality name-brand full or semi-synthetic motorcycle oil in the proper 15W-50 weight that meets API SH (or higher) and JASO MA-2.

It is important to note that 10W-40 grade oil used on many other models MUST NOT be used in Rocket 3 models. Triumph has specified the heavier 15W-50 grade specifically for this engine.

If you have any additional questions, please contact Triumph Customer Support at (888) 284-6288.
