## Rear Oxygen Sensor Limited Warranty Extension

For applicable vehicles, the New Vehicle Limited Warranty will be extended to cover repair or replacement (by an authorized Audi dealer) of a failed rear oxygen sensor (“oxygen sensor”) during a period of 10 years or 120,000 miles, whichever occurs first, from the vehicle’s original in-service date.

The vehicle’s original in-service date is defined as the date the vehicle was delivered to either the original purchaser or the original lessee; or if the vehicle was first placed in service as a “demonstrator” or “company” car, on the date such vehicle was first placed in service.

### What is Covered?

The warranty extension will be subject to the terms and conditions of the original applicable New Vehicle Limited Warranty (other than the extended time/mileage period) and will include the oxygen sensor and any parts and labor necessary to effectuate a repair. It will apply to all vehicles irrespective of whether the vehicle has been repaired on or before the effective date.

Damage resulting from outside influences, such as but not limited to, abuse, alteration or modification, a collision or crash, vandalism and/or other impact is excluded and not covered under the extended warranty. Repair or replacement under this extended warranty must be performed by an authorized Audi dealer.
