

# WLA4 Workshop campaign - Retrofitting heat shield

Version 1

## **WLA4 Workshop campaign - Retrofitting heat shield**

### **Overview**

In the past, there have been isolated incidences of damage caused by fire occurring in the engine compartment.

Analysis of this damage has identified foreign objects or materials (e.g. cleaning cloths) found in the engine compartment as the cause of these incidents. Foreign objects or materials of this kind can touch hot exhaust system components while driving, causing them to ignite.

To prevent such incidents in the future, an additional heat shield will be installed in the relevant vehicles. This may help to prevent any foreign objects or materials from coming into contact with exhaust-carrying or hot components in the engine compartment.

Please arrange for this measure to be carried out on the affected vehicles immediately.

<b>Model type</b>	911 Carrera (991) 911 Turbo (991)
<b>Model year</b>	2012 to 2016 2014 to 2019
<b>Number</b>	41,925

### Porsche Mobility

If requested, the mobility of the affected customer can be guaranteed by offering a suitable replacement vehicle.

Please invoice this additional service with the campaign scope via WWS.
