

WLC9 - Workshop Campaign - Re-programming roof console

Version 2

Overview

On affected vehicles, a component protection function may deactivate the "PASSENGER AIR BAG OFF/ON" indicator light in the roof console area at temperatures above 100 °C, for example, in direct sunlight for a longer period of time. As soon as the temperature drops, the indicator light function will be activated again.

When the "PASSENGER AIR BAG OFF/ ON" indicator light is deactivated, the airbag warning light comes on in the instrument cluster. All safety and restraint systems function at all times according to specifications and the fault does not affect occupant protection.

To prevent deactivation of the "PASSENGER AIR BAG OFF/ ON" indicator light, the roof console must be re-programmed with an updated data record.

Please arrange for this measure to be carried out on the affected vehicles the next time the vehicles come into the workshop.

Model type	Panamera (971)
Model year	2017 to 2020
Number	22,612

Required software

PIWIS Tester 3 test software version	39.300.020 (or higher)
--------------------------------------	------------------------

Warranty processing

Please enter the completed campaign into the Guarantee and Maintenance booklet of the vehicle.

Scope 1:

Damage Code	WLC9 66 000
Repair Code	1
Working time	39 TU

Further information

Work instruction	TI No. 51/20, Group 7, Service, WLC9
Vehicle list and allocation*	See PCSS or attached list for reference
Technical Information*	See PCSS or attached PDF for reference
