Reminders

▶ **All items must be completed prior to customer delivery by a certified Audi technician**

▶ **Audi recommends using an Audi approved battery charger to prevent excessive battery discharge during inspection**

▶ **Guided Fault Finding must be used, session must be completed and sent to GFF Paperless**

▶ **Total PDI Test must be completed prior to any other work involving the scan tool (special function tab -> Total PDI Test)**

▶ **Start Guided Fault Finding with the engine running to ensure control modules in transport mode are identified**

▶ **For items marked with *, please refer to the PDI Technician Reference Document posted on ServiceNet for additional information**

▶ **For items marked with **, follow instructions for stock inventory vehicle**

Vehicle Preparation

☐ Check Elsa for open campaigns and updates

☐ Verify Audi phone box customer registration form is present in vehicle and add the serial number, FCC ID, and Model from Elsa (if equipped). See TSB 2051720

☐ Perform any open campaigns*

☐ Perform diagnostics work*

☐ Install front license plate carrier (if necessary)*

Exterior

☐ Check all key buttons and features*

☐ Check all doors for proper power closing (if equipped)*

☐ Inspect exterior for damage, dings, dents and surface scratches. Report and repair any damage **before** delivery to the customer

Lighting and Windshield

☐ Test exterior lighting functions

☐ Test windshield washers (and headlight washers if equipped) Correct aim if necessary*

Trunk Inspection

☐ Verify power tailgate is operational and set to maximum opening height (if equipped)*

☐ Verify operation of emergency release handle

☐ Install wheel bolt cover removal tool from PDI kit into trunk tool kit*

☐ Verify tool kit is installed securely in luggage compartment

Trunk Inspection (continued)

☐ Check battery clamps for proper torque*

☐ Set spare tire pressure*

Interior

☐ Verify operation of all seat belts and latches

☐ Check operation of window, lock, and seat controls*

☐ Inspect mirrors for proper operation*

☐ Check rear view mirror operation*

☐ Verify operation of all interior lights

☐ Check heated steering wheel (if equipped, otherwise, ignore DTC B153813)

☐ Verify operation of heated/ventilated and massaging seats (if equipped)*

☐ Verify operation of manual folding 2nd row seats

☐ Verify proper operation of climate control*

☐ Inspect operation of all power outlets*

☐ Check panoramic sunroof and sunshade operation*

☐ Verify operation of rear side sunshade operation (if equipped)

☐ Verify operation of front Passenger Occupant Detection System

Settings

☐ Verify operation of MMI® touch screens, upper and lower

☐ Set Time source setting to "GPS" and set Auto daylight savings time to "on"*

☐ Verify and set language and measurement units*

Audi Phone Box-Equipped Vehicles

Operation of the Audi Phone Box is subject to the following requirements of the Federal Communications Commission:
This is a CONSUMER device.

BEFORE USE, you MUST REGISTER THIS DEVICE with your wireless provider and have your provider's consent. Most wireless providers consent to the use of signal boosters. Some providers may not consent to the use of this device on their network. If you are unsure, contact your service provider.

You MUST operate this device with approved antennas and cables as specified by the manufacturer. Antennas MUST be installed at least 20 cm (8 inches) from any person.

You MUST cease operating this device immediately if requested by the FCC or a licensed wireless service provider.

WARNING. E911 location information may not be provided or may be inaccurate for calls served by using this device.

Make #   FKW

Model #

Serial #   FKW -

FCC ID

This Signal Booster fulfills the FCC requirements for the Network Protection Starndard (NPS). It incorporates features to prevent harmful interference to wireless networks like:

- ▸ Anti-oscillation to detect and mitigate any unintended oscillations in uplink and downlink frequency bands,
- ▸ Adaptive gain control with self-monitoring and to power down automatically as approaching any affected base station,
- ▸ Uplink Inactivity to shut down the transmit amplifiers if not serving an active device connection.

This Signal Booster includes features to prevent harmful interference. These features are enabled and operating at all times the signal booster is in use, they may not be deactivated by the operator.
