

**95B Manually Teach Tire Pressure Monitoring System if a Warning Occurs at PDI**

**Vehicles Affected**

Models	Model Year	Model Type	VIN Range	Vehicle-Specific Equipment
Macan	As of 2020	95B	N/A	N/A

**Revision History**

Revision	Release Date	Changes
0	December 17, 2020	Original document

**Condition**

After PDI, during the road test, a tire pressure monitoring warning appears in the instrument cluster. The message says service is required.

**Technical Background**

Porsche is investigating this issue and we expect to provide a permanent solution shortly.

**Service Information**

As an interim solution, please manually teach the wheel IDs with the PIWIS tester using the instructions in WM 443455 Replacing control unit for Tire Pressure Monitoring (TPM). When a permanent solution is available, we will adjust or remove this document.

**Important Notice:** Technical Bulletins issued by Porsche Cars North America, Inc. are intended only for use by professional automotive technicians who have attended Porsche service training courses. They are written to inform those technicians of conditions that may occur on some Porsche vehicles, or to provide information that could assist in the proper servicing of a vehicle. Porsche special tools may be necessary in order to perform certain operations identified in these bulletins. Use of tools and procedures other than those Porsche recommends in these bulletins may be detrimental to the safe operation of your vehicle, and may endanger the people working on it. Properly trained Porsche technicians have the equipment, tools, safety instructions, and know-how to do the job properly and safely. Part numbers listed in these bulletins are for reference only. The work procedures updated electronically in the Porsche PIWIS diagnostic and testing device take precedence and, in the event of a discrepancy, the work procedures in the PIWIS Tester are the ones that must be followed.
