Do you have a client who has complained about the error message com.honda.auto.automotiveservice.AutoAplication isn't responding on their center display?

This is a known software bug that can appear randomly. Pressing OK on the screen will dismiss the message and will not affect anything else on the vehicle. We are currently working on a software fix that is tentatively planned to be released via OTA sometime in the late spring of this year. Until the OTA update is released, there is no need to replace any parts.
