# AUXILIARY REAR HEAT AND AIR CONDITION SYSTEM

## Freightliner Trucks offers auxiliary HVAC

Freightliner trucks is now offering an auxiliary HVAC system for rear cab comfort in M2 crew cab vehicles. This new option is provided by Sportchassis and is currently available to order in SpecPro.

### What is it?

- New auxiliary HVAC system designed by Sportchassis and installed at Freightliner PDI centers
- Unit is located beneath the hump in the cab floor (see top picture)
- Ducting is routed up the C pillar and vents are located in the headliner (see middle picture)
- Operated with in dash controls (see bottom picture)
- Cools by using existing oversized condenser unit under the hood and a powerful blower unit with separate controls
- Operates without taking any power from existing system
- Alternative to the optional auxiliary HVAC black box (689-003) located in the middle of the floor between the seats

### Why is it important?

- Rear passenger comfort

#### Key Benefits:

- Out of the way, under-cab design
- Works with existing system

#### Availability:

- M2106 and M2112
- Crew cabs only

### Where do I find this information?

#### Data Codes

689-092 – PDI installed Sportchassis cab comfort system
