

WME2 - Retrofit control unit for electrical steering column adjustment

Version 1

Important Information

- Please note that this PPN information serves as accompanying advanced information for the WME1 vehicle blocking / Stop Delivery. The affected vehicles will be added to this campaign when the required control units are available. In the meantime, the affected vehicles will be shown within vehicle blocking / Stop Delivery WME1.
- At this time, no statement can be made yet regarding the availability of parts. Together with our suppliers, we are working with high priority to procure the required capacities of components. As soon as these parts are available and the retrofitting of the steering column adjustment control unit is possible, we will inform you immediately.

Overview

Due to worldwide semiconductor bottlenecks at individual suppliers, the affected vehicles were built without a control unit for the electric steering column adjustment.

The electric adjustment of the steering wheel position is therefore not available on these vehicles.

For this reason, the control unit for the electric steering column adjustment must be retrofit on the affected vehicles

Model type	Cayenne (9YA / 9YB)
Model year	2021
Manufacturing period	Between 5/10/2021 and TBD*
Vehicle specifications	Electric steering column adjustment (I-No. 2C7)
Number of affected vehicles	TBD*

*Please note that vehicles from current production will be added to this campaign on a daily basis. The manufacturing period and the number of affected vehicles may still change due to volatile availability of the control units. Always check for open campaigns in PCSS.
