Product Change Notice - One style reservoir replacing vertical and horizontal

Dear Valued Customer:

Please be advised, Lippert is changing from two styles of hydraulic pump reservoirs (horizontal and vertical) (Fig. 1) to one style that can accommodate both orientations (Fig. 2).

The new reservoir was designed with a divot (Fig. 2A) at locations for both vertical and horizontal applications. The new reservoir will be sold using two part numbers with the appropriate divot punched and capped. There is no change in fluid capacity, installation or operation. The reservoir comes attached to the hydraulic power unit from the factory.

There is no change in price or part number. The part number for the horizontal pump is 251271 and the vertical pump is 251272. The change is expected to begin 5/26/2021.
