RE: Service Topic 349 – Red Dot Ceiling Mounted R-6555 Evaporator Filter Replacement

Overview

The Red Dot R-6555 air conditioning system is found in all Dash CF, Velocity FR and Impel FR custom cabs. To ensure proper maintenance of this a/c system, Red Dot recommends that the evaporator filter be replaced every 90 days. Additionally, while changing the evaporator filter, Red Dot recommends that the drain pans be cleaned and the condensate pump filter is inspected and replaced as necessary. To help facilitate this requirement, Pierce has established part numbers and pricing for the evaporator and condensate pump filters.

Part Numbers

Below are the current part numbers, description and pricing for the replacement filters.

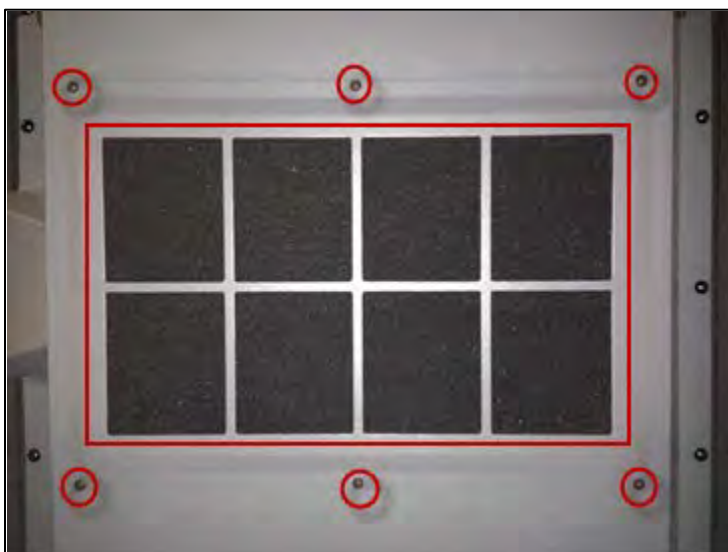

Part Number	Description	Dealer List Price
2249234	FILTER, AIR INTAKE, EVAPORATOR	\$21.55
1378717	FILTER, IN-LINE DEBRIS (Condensate Pump Filter)	\$32.27

***Pricing valid until 8/19/2015**

Part Identification

The filter has easy access and can be quickly changed out by removing the six screws that are shown below. If there are any questions you may contact Pierce Manufacturing Customer Service at (888) 974-3723
