Start/Stop system inhibit - Driver's seat belt unfastened

Customer statement / workshop findings

The Start/Stop system functions with the driver's seat belt not fastened although the Owners handbook states that the driver's seat belt must be fastened for the Start/Stop system to function

Technical background

On all 2020 model year vehicles specified with a V8 engine, the Start/Stop system will function with the driver's seat belt not fastened although the Owners handbook states the driver's seat belt must be fastened for the Start/Stop system to work, the system in this scenario is functioning correctly

Due to a change to one of the system inhibits, the 2021 model year Owners handbooks will be updated to confirm the Start/Stop system will work with the seat belt unfastened

Production change

Not applicable

Measure

Refer to Technical background section of this TPI

Customer information

Refer to the Owners handbook for all other information regarding the Start/Stop system, and the correct usage of the seat belts
