Product Change Notice - Rivets changed to screws on 08 and DR13 baggage doors

Dear Valued Customer:

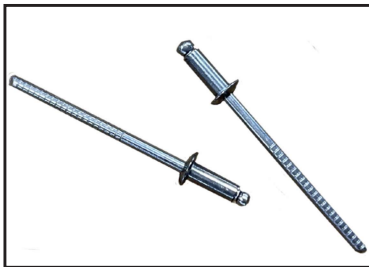

Please be advised Lippert intends to change the fasteners for the panel to the frame from rivets to screws on 08 and DR14 series baggage doors with extruded or piano hinges.

We determined using screws not only makes for a smoother production process, but also creates a more durable product. The screws passed pull testing, slam testing and durability testing. Test results available upon request.

The change also makes service in the field easier as the rivets no longer need to be drilled out for replacement.

The part number for the current rivet is 255902. The part number for the screw is 338951. There is no change in fit, form, function, installation or operation with the hardware change. The change will begin on a running basis, starting immediately.

Current - Rivets

New - Screws

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,

Scott McKinnon
