

Volvo Chassis - Model VN - Loss Of Cab Heat, Bunk Heat Working - Model Year 2016 And Newer

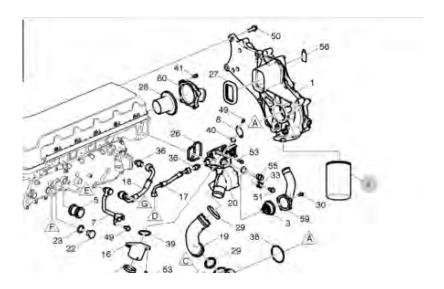

Article

> Internal Content

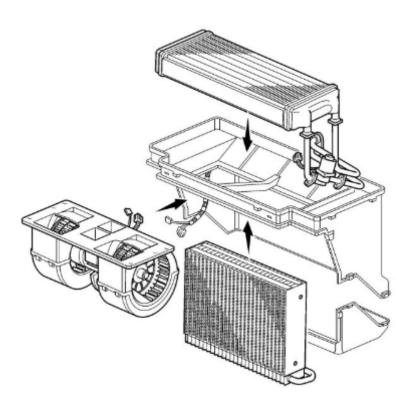

If loss of cab heat is experienced:

- **1.** Run the vehicle until the coolant is up to operating temperature.
 - · Drain coolant from the system.
 - · Flush the system with water until the water runs out clear.
- 2. Replace the coolant filter (if equipped).

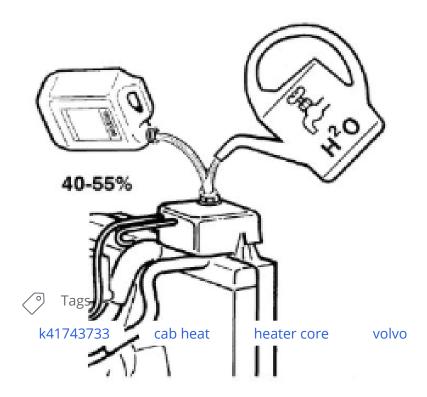

3. Flush the heater core from both directions with hot water. The water should run clear. (Operation 8732-03-02-02 Heater Core, Cab, Replacement)
