This bulletin supersedes TSB-19-52A-004, issued October 2019, and updates the procedures to help resolve the power seat movement. Revisions are italicized and indicated by ◀.

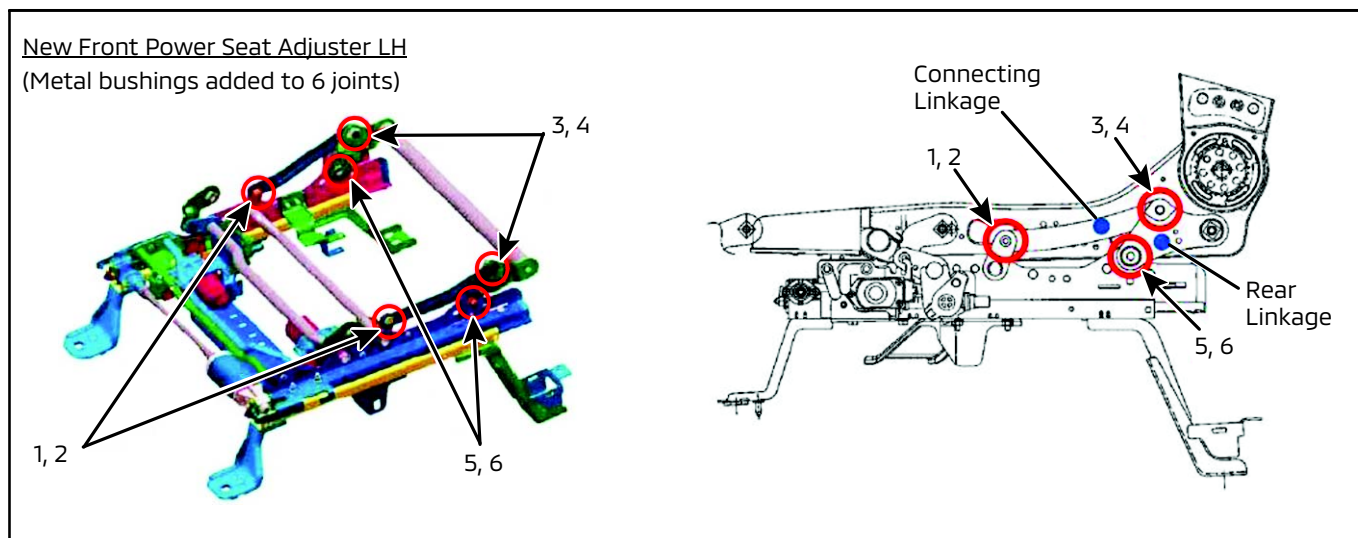

PURPOSE

Some customers may notice excessive intermittent movement of the driver's power seat, typically when accelerating or decelerating. Further production changes have been implemented to address this seat movement.

This TSB instructs dealers to replace the seat adjuster assembly and power seat harness in affected vehicles with improved countermeasure parts. Due to a change in the reclining motor, the new longer harness and connector are necessary.

BACKGROUND

Height adjustment linkages in the seat adjuster assembly may loosen over time with normal driving and allow movement. A new seat adjuster was implemented in production at the supplier from March 2, 2016, and has added metal bushings at the 6 rotational connections on the seat frame, as shown below.

The clearance of the slide rail and rubber damper has also been changed in production at the supplier starting September 19, 2018. Refer to the VINs listed in Affected Vehicles.

The clearance of the bearing plate hole size has also been changed in production at the supplier starting May 10, 2021. Refer to the VINs listed in Affected Vehicles.

REPAIR PROCEDURE

1. If a customer reports excessive movement of the driver's power seat on the vehicles listed in this TSB, replace the front power seat adjuster assembly and the power seat harness with the new countermeasure parts. Refer to the Parts Information section in this TSB for the correct part number for each vehicle.

For detailed replacement instructions, refer to the applicable Service Manual:

- Group 52A-Interior -> Seat Assembly -> Front Seat Assembly -> Removal and Installation
- Group 52A-Interior -> Seat Assembly -> Front Seat Assembly -> Disassembly and Reassembly.

2. Verify proper operation of all front power seat assembly functions, and verify that the movement concern has been resolved.

PARTS INFORMATION

Use only the Genuine Mitsubishi Parts listed below.

NOTE: Refer to Affected Vehicles section for ending VINs of vehicles needing countermeasure parts.
