Product Change Notice - Removal of Installation Clips

Dear Valued Customer:

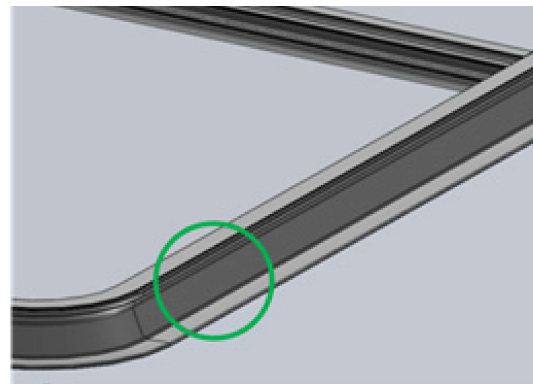

As part of our ongoing efforts to improve product performance and mitigate supply chain issues, Lippert will be removing installation clips from all window series.

Installation clips were originally designed to keep the window centered in the opening and moderate oversized openings. Through the years, customer process capability has become much more consistent resulting in better fitment. Additionally, trim rings when used in standard application aid in centering windows in the opening. Lippert has tested the removal of installation clips under vibration and has found no evidence of compromised performance. Test Reports are available upon request.

Supply chain issues have continued to challenge us to find opportunities for product improvements that allow us to maintain on time delivery and still provide quality products.

With installation clip

Without installation clip

This change applies to 2000, 3000, 8600 and 8800 window series. There is no change in window installation and all manuals will be updated to reflect this change. The change will be made on a running basis on or around December 1, 2021.

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,

Mason Ogle

VP of RV Sales
